

### **Attach at the end of your homework assignment**

Before writing up your homework, read handouts “Communicating Mathematics through Homework and Exams” and “Some Guidelines for Good Mathematical Writing”. Then, later, at the end of your write-up, include the following, labeling this as “**Writing exercise**”.

- (a) List three things you learned or thought about more carefully after reading these documents.
- (b) Mark up your finished homework assignment, showing where you followed or failed to follow the mechanical and stylistic issues outlined in the handout *Communicating Mathematics. . .*. This means **treat your write-up as a second-to-last draft**, and go point-by-point through the handout and address instances where you followed or did not follow each direction in your writing. Use a different-colored pen if you have one, and hand in this marked up draft. You do not need to rewrite the result.

How might you improve in the future?

- (c) List three or more ways that you succeeded or failed at following the advice in *Some Guidelines. . .*. How might you improve in the future?

To receive credit for this homework assignment, you must complete this exercise.
